## School of Engineering

### Engineering Courses in English for Exchange Students

<b>International Project Engineering, Bachelor .....</b>	<b>3</b>
Project Management.....	3
Finance and Investment .....	6
Accounting.....	8
Project Budgeting and Controlling .....	10
Plant Engineering .....	13
Project Management Certification .....	14
Intercultural Communication .....	16
Scientific Approaches and Methods.....	18
Smart Systems.....	20
Advanced Project Management.....	22
Strategic Leadership .....	25
Information Management .....	27
Supply Chain Management.....	28
Marketing Project.....	29
Management Simulation .....	32
<b>Mechanical Engineering Bachelor .....</b>	<b>34</b>
Heat Transfer .....	34
Design Methodology .....	36
Finite Element Method.....	37
Applied Acoustics .....	38
Data Science .....	39
<b>Mechanical Engineering Master .....</b>	<b>41</b>
Applied Mathematics .....	41
Numerical Structural Mechanics .....	42
Basic Principles of Energy Conversion .....	43
<b>Mechatronics Bachelor .....</b>	<b>44</b>
Electrical Drives.....	44

Interactive Robots in Motion .....	46
Power Electronics Laboratory .....	48
Semiconductor Devices .....	49
Communication Systems .....	51
Communication Systems Laboratory.....	52
PLC Control Systems.....	53
PLC Control Systems Laboratory .....	54
<b>Mechatronics Master .....</b>	<b>55</b>
Distributed Control in Power Grids .....	55
Software-System Architecture .....	56
EMC and Signal Integrity.....	58
EMC and Signal Integrity Laboratory.....	58
Human-Robot Collaboration - Introduction .....	60
Human-Robot Collaboration - Applications .....	62
Machine Vision and Artificial Intelligence Lecture with Laboratory .....	64
Renewable Energies .....	66
Control Systems .....	67
Control Systems Laboratory.....	68
<b>Distributed Energy Systems and Energy Efficiency, Master .....</b>	<b>69</b>
Distributed Economy in the Energy Sector .....	69
<b>Interdisciplinary courses.....</b>	<b>70</b>
Career Management .....	70
<b>Projects for Bachelor and Master Students.....</b>	<b>71</b>
Semester Engineering Project.....	71

## International Project Engineering, Bachelor

Project Management	
<b>Study Programme</b>	International Project Engineering Bachelor, 1 <sup>st</sup> and 2d Semester
<b>Total ECTS Credits</b>	5
<b>Total hours per week</b>	4 / 60
<b>Total hours of study</b>	150
<b>Type/Teaching Method</b>	Seminar-style lecture
<b>Language of instruction</b>	English
<b>Frequency</b>	Every Semester
<b>Course Coordinator/Instructor</b>	Prof. Dr.-Ing. Jochen Brune, MBA E-Mail: <a href="mailto:Jochen.brune@reutlingen-university.de">Jochen.brune@reutlingen-university.de</a>
<b>Restrictions</b>	Only 5-6 international Students at the maximum can be admitted to this course
<b>Objectives</b>	<p>Professional competencies</p> <p>The students are able...</p> <ul style="list-style-type: none"> <li>to describe the fundamental principles of project leadership and project management.</li> </ul> <p>Methodological competencies</p> <p>The students are able...</p> <ul style="list-style-type: none"> <li>to describe and apply the fundamental methods and techniques of project leadership.</li> <li>to practically apply important methods and techniques of project management to successfully plan a project.</li> <li>to plan a project regarding scope, schedule, cost and quality.</li> <li>to analyze a given project in detail and to optimize it regarding scope, schedule, cost and quality.</li> </ul> <p>Social competencies</p> <p>The students are able...</p>

	<ul style="list-style-type: none"> <li>to analyze communication failures and create communication strategies in leadership situations.</li> <li>to actively manage conflicts and negotiation situations.</li> <li>to understand and practically apply the fundamentals of human motivation, personal preferences and team behavior to lead a project to success</li> </ul> <p>Personal competencies</p> <p>The students are able...</p> <ul style="list-style-type: none"> <li>develop an understanding of the requirements towards a project leader.</li> <li>to solve complex leadership problems individually as well as in a team setup.</li> <li>to understand why structuring and planning are prerequisites for successful execution of complex projects.</li> </ul>
<b>Assessment</b>	<p>Written exam, 3h</p> <p>Fall Semester: Students who wish to take the exam must be in Reutlingen for the exam.</p>
<b>Project Leadership</b>	
<b>Contents:</b>	<p><u>Fundamental methods and techniques for project leadership:</u> Creativity techniques, problem solving techniques, communication and communication failures, communication in leadership situations, conflicts and conflict management, Negotiation, personality &amp; preferences, influencing others, motivation, team management, virtual teams</p>
<b>Textbooks:</b>	<p>Fundamentals:</p> <ul style="list-style-type: none"> <li>Meredith, Jack; Mantel, Samuel: 'Project Management – A Managerial Approach', 11th ed. (International Student Version), Wiley, aktuelle Auflage</li> <li>Jenny, Bruno: 'Projektmanagement – Das Wissen für eine erfolgreiche Karriere', aktuelle Auflage, vdf Hochschulverlag, Zürich</li> </ul> <p>Additional:</p> <ul style="list-style-type: none"> <li>Kerzner, Harold: 'count: A Systems Approach to Planning, Scheduling, and Controlling', John Wiley &amp; Sons; aktuelle Auflage</li> <li>Jenny, Bruno: Projektmanagement – Das Wissen für den Profi, aktuelle Auflage, vdf Hochschulverlag, Zürich</li> </ul>
<b>Project Planning</b>	
<b>Contents:</b>	<p>Introduction to classical project management methods and techniques, with the focus on structured project planning and optimization.</p> <p><u>Fundamental principles of project management:</u> Projects, triple constraint, differences between working in projects and working in operations, project success and failure, tasks of a project manager, project organisation forms, forms</p>

	<p>of project lifecycle, activities at project start, project management core processes (planning, project start, project execution, project controlling, project closing), supporting and facilitating processes.</p> <p><u>Methods of classical project management:</u></p> <p>Project proposal, Product Breakdown Structure (PBS), Work Breakdown Structure (WBS), Work Package Descriptions (WPD), Project Network Diagram (PND) (activity sequencing), Project schedule, effort and duration estimation, Organisational Breakdown Structure (OBS), Responsibility Assignment Matrix (RAM), resources plan, resources optimization, cost structure plan, project budget plan, introduction to Discounted Cash Flow (DCF) techniques (Net Present Value (NPV), Internal Return Rate (IRR))</p> <p><u>Methods of agile project management:</u></p> <p>Predictive vs. New Product Development, The Agile Manifesto, waterfall vs. agile project success, user stories, agile effort estimation, planning poker, Definition of Done, Introduction to Scrum, Scrum process, Scrum roles, Scrum artefacts, Scrum limitations</p>
<p><b>Textbooks:</b></p>	<p>Fundamentals</p> <ul style="list-style-type: none"> <li>- Meredith, Jack; Mantel, Samuel: 'Project Management – A Managerial Approach', 9th ed. (International Student Version), Wiley, 2015</li> <li>- Jenny, Bruno: 'Projektmanagement', vdf Hochschulverlag, Zürich 2005</li> </ul> <p>Additional:</p> <ul style="list-style-type: none"> <li>- Kerzner, Harold: 'Project Management: A Systems Approach to Planning, Scheduling, and Controlling', John Wiley &amp; Sons; 12th Ed. (2017)</li> <li>- Basiszertifikat im Projektmanagement (GPM) GPM Deutsch Gesellschaft für Projektmanagement / Michael Gessler (Hrsg.)GPM Deutsche Gesellschaft für Projektmanagement e.V., 2010, ISBN: 9783942660136, 854 Seiten 3. Auflage</li> </ul>

Finance and Investment	
<b>Study Program</b>	International Project Engineering
<b>Study level and semester</b>	Bachelor, 3 <sup>rd</sup> Semester
<b>ECTS Credits</b>	3
<b>Hours per week / total contact hours</b>	2 / 30
<b>Total hours of study</b>	90
<b>Type/Teaching Method</b>	Lecture, case studies, group tasks
<b>Language of instruction</b>	English
<b>Frequency</b>	Every Semester
<b>Course Coordinator/Instructor</b>	Prof. Dr. Antje Brüsch E-Mail: <a href="mailto:Antje.Bruesch@Reutlingen-University.DE">Antje.Bruesch@Reutlingen-University.DE</a>
<b>Restrictions</b>	Only 5-6 international Students at the maximum can be admitted to this course
<b>Course learning objectives:</b>	<p>At the end of the course students should:</p> <p><u>Professional competencies</u></p> <ul style="list-style-type: none"> <li>• be able to make decisions related to investments / evaluate, which alternatives are the best from an economic perspective (regarding investment).</li> <li>• be able to discuss and evaluate the pros and cons of different financing alternatives and decide which one is the best, regarding the specific financial circumstances of a company.</li> <li>• have understood basic concepts of investment appraisal and corporate finance and apply them in real-life situations.</li> </ul> <p><u>Methodological competencies</u></p> <ul style="list-style-type: none"> <li>• be trained in analytical and methodical competences, related to investment decisions based on the circumstances a company is facing.</li> <li>• be qualified to define targets, plan investments and the associated financing and therefore select appropriate methods, measures and tools.</li> </ul> <p><u>Social competencies</u></p> <ul style="list-style-type: none"> <li>• learned to deal with each other and develop respect for one another through group discussions and practical exercises in teams.</li> </ul> <p><u>International competencies</u></p> <ul style="list-style-type: none"> <li>• Improved their English language skills in the area of investment and finance.</li> </ul>
<b>Contents:</b>	For their operations, a company needs assets, which have to be financed. Financial resources could be given by equity and/or debt investors.

	<p>The course deals with the challenge of a company to meet the expectations of investors. Therefore, the planning and calculation of financial resources of a company is key in the investment field.</p> <p>The funding of these needs is the basis for the finance part of the course. The focus in this area is on the possibilities of internal and external financing as well as equity and debt financing.</p>
<b>Textbooks:</b>	<p>Brealey, R, Myers, S, Allen, F, current edition. Principles of Corporate Finance, McGraw Hill.</p> <p>Zantow, R., aktuelle Auflage. Finanzierung: Die Grundlagen modernen Finanzmanagements, Pearson Studium.</p> <p>various articles</p>
<b>Assessment</b>	<p>Graded: Oral exam 15 min</p>

<b>Accounting</b>	
<b>Study Program</b>	International Project Engineering
<b>Study level and semester</b>	Bachelor, 2 <sup>nd</sup> Semester
<b>ECTS Credits</b>	3
<b>Hours per week / total contact hours</b>	2 / 30
<b>Total hours of study</b>	90
<b>Type/Teaching Method</b>	Lecture, case studies
<b>Language of instruction</b>	English
<b>Frequency</b>	Every Semester
<b>Course Coordinator/Instructor</b>	Prof. Dr. Antje Brüsch E-Mail: <a href="mailto:Antje.Bruesch@Reutlingen-University.DE">Antje.Bruesch@Reutlingen-University.DE</a>
<b>Restrictions</b>	Only 5-6 international Students at the maximum can be admitted to this course
<b>Prerequisites:</b>	Fundamentals of business administration
<b>Course learning objectives:</b>	<p>At the end of the course students should:</p> <p><u>Professional competencies</u></p> <ul style="list-style-type: none"> <li>• have understood the holistic accounting system and should be able to explain the reasons / needs for the different segments of accounting.</li> <li>• be able to use the appropriate measure or method in specific circumstances and can explain the impact on the financial figures of a company.</li> </ul> <p><u>Methodological competencies</u></p> <ul style="list-style-type: none"> <li>• be trained in analytical, methodical and economical competences, related to accounting in general.</li> <li>• be qualified to define the required financial information in specific situations and should be able to evaluate the financial health of a company and deduce a clear statement.</li> </ul> <p><u>Social competencies</u></p> <ul style="list-style-type: none"> <li>• learned to deal with each other and develop respect for one another through group discussions and practical exercises in teams.</li> </ul> <p><u>International competencies</u></p> <ul style="list-style-type: none"> <li>• Improved their English language skills in the area of managerial accounting.</li> </ul>
<b>Contents:</b>	<p>Today, accounting is called 'language of business'. The course deals with the challenge of a company to record and report the appropriate information depending on different information addressees (Shareholder, Stakeholder, Manager, etc.).</p> <p>Therefore, the course deals with four segments of accounting:</p>

	<ul style="list-style-type: none"><li>• double entry accounting</li><li>• cost accounting</li><li>• planning and shows relationships between these aspects.</li></ul>
<b>Textbooks:</b>	Taschner, A., Charifzadeh, M., aktuelle Auflage. Management and Cost Accounting, Wiley. Olfert, K., aktuelle Auflage. Kostenrechnung, Kiehl. various articles
<b>Assessment</b>	Graded: Oral exam 15 min

Project Budgeting and Controlling	
<b>Study Program</b>	International Project Engineering
<b>Study level and semester</b>	Bachelor, 4 <sup>th</sup> Semester
<b>Total ECTS credits</b>	7
<b>Total hours per week</b>	5
<b>Hours per week / total contact hours</b>	5 / 75
<b>Total hours of study</b>	210
<b>Type/Teaching Method</b>	Lecture, case studies, group tasks, e-learning, Laboratory internship (Taught as compact course on 3-4 selected dates)
<b>Language of instruction</b>	English
<b>Frequency</b>	Every Semester
<b>Course Coordinator/Instructor</b>	Prof. Dr. Antje Brüsch E-Mail: <a href="mailto:Antje.Bruesch@Reutlingen-University.DE">Antje.Bruesch@Reutlingen-University.DE</a>
<b>Restrictions</b>	Only 5-6 international Students at the maximum can be admitted to this course
<b>Course learning objectives:</b>	<p>After course completion, students:</p> <p><u>Professional competencies</u></p> <ul style="list-style-type: none"> <li>▪ can deduce a cost baseline.</li> <li>▪ are able to use and adapt techniques for cost and risk analysis.</li> <li>▪ are able to develop a budget.</li> <li>▪ are able to define recovery measures.</li> <li>▪ are able to define the structure of a multi project.</li> </ul> <p><u>Methodological competencies</u></p> <ul style="list-style-type: none"> <li>▪ are able to understand the needs of multi project and single project control.</li> <li>▪ are able to apply the methods used in multi and single project control.</li> <li>▪ are able to forecast future trends.</li> <li>▪ are able to structure and plan projects.</li> <li>▪ are able to estimate the effort to reach project targets.</li> </ul> <p><u>Social competencies</u></p> <ul style="list-style-type: none"> <li>▪ are able to report (interim) results, according to the needs of information addressees.</li> </ul> <p><u>International competencies</u></p> <ul style="list-style-type: none"> <li>▪ improved their English writing skills with group tasks and case studies.</li> </ul>
<b>Assessment</b>	Graded: Written Exam 2 hours; Computer Lab Assignments, Testat/ Attestation
<b>Contents:</b>	<p>Empirical surveys show, that:</p> <ul style="list-style-type: none"> <li>▪ 20% of all IT-Projects will be cancelled</li> <li>▪ Every second project will overrun time and / or will be more expensive</li> </ul>

	<ul style="list-style-type: none"> <li>Probability of failures rise with duration time and complexity!</li> </ul> <p>The course deals with the challenge, to define a proper baseline for a project and deduce (based on that baseline) a realistic budget as benchmark for the following controlling process.</p> <p>Therefore, students should reach the capability to define a proper baseline (plan), control complex projects and provide appropriate information to decision makers during the project.</p> <p>Overall, students should understand the necessity of project budgeting and controlling and learn to consider the management accountant as their "partner" in order to support the decision making throughout the project on all hierarchical levels</p>
<b>Textbooks:</b>	<p>Fiedler, R., aktuelle Auflage. Controlling von Projekten, Vieweg Verlag.</p> <p>Horngren, C.T. et al., current edition. Introduction to Management Accounting, Pearson.</p> <p>Kerzner, H., current edition. Project Management: A Systems Approach to Planning, Scheduling, and Controlling, John Wiley &amp; Sons.</p> <p>Various articles</p>
<b>IPE Project Lab</b>	
<b>Course Coordinator/Instructor</b>	<p>Dr. Schmid, Elisabeth</p> <p><a href="mailto:Elisabeth.Schmid@Reutlingen-University.DE">Elisabeth.Schmid@Reutlingen-University.DE</a></p>
<b>Restrictions</b>	Only 5-6 international Students at the maximum can be admitted to this course.
<b>Course learning objectives:</b>	<p>After the completion of the course, students:</p> <p><u>Professional competencies</u></p> <ul style="list-style-type: none"> <li>are able to estimate the “duration, cost and degree of completion” of practical oriented case studies.</li> <li>are able to take advantage of project-based learning and modern project management software in the planning, organisation, budgeting and resource assignment of complex projects.</li> <li>are able to perform project monitoring, project control and project optimization.</li> <li>are able to execute independently activities in the project management of complex Projects</li> </ul> <p><u>Methodological competencies</u></p> <ul style="list-style-type: none"> <li>are able to generate technical reports.</li> <li>Social competencies/International competencies</li> <li>are able to use business English in project management.</li> <li>Personal competencies</li> <li>are able to set their own deadlines and to evaluate the progress towards the given goals.</li> </ul>
<b>Contents:</b>	<p>Principles and limitations of professional project planning software.</p> <p>Computer-based project plan, budgeting, resource assignment.</p> <p>Computer-based project monitoring, project control and project optimization.</p> <p>Reporting in the engineering and in the project management:</p> <p>Gantt Chart and Project Network Diagrams</p> <p>Milestone plans, timelines and tables of activities technical reporting</p>

-------------------	--

Plant Engineering	
<b>Study Program</b>	International Project Engineering
<b>Study level and semester</b>	Bachelor, 4 <sup>th</sup> Semester
<b>ECTS Credits</b>	5
<b>Hours per week / total contact hours</b>	3/ 45
<b>Total hours of study</b>	150
<b>Type/Teaching Method</b>	Lecture (70%) with integrated exercises (30%)
<b>Language of instruction</b>	English
<b>Frequency</b>	Every Semester
<b>Course Coordinator/Instructor</b>	Prof. Dr.-Ing. Georg Samland E-Mail: <a href="mailto:Georg.Samland@Reutlingen-University.DE">Georg.Samland@Reutlingen-University.DE</a>
<b>Course learning objectives:</b>	<p>After the completion of the course, students:</p> <p><u>Professional competencies</u></p> <ul style="list-style-type: none"> <li>- know the components used in typical plants.</li> <li>- are able to read and interpret P&amp;ID-diagrams</li> <li>- are able to discuss plant-engineering problems.</li> <li>- are aware of HAZOP-studies and SIL-categories.</li> <li>- are able to calculate and size typical piping configurations.</li> </ul> <p><u>Methodological competencies</u></p> <ul style="list-style-type: none"> <li>- have fundamental knowledge in plant engineering and they are able to discuss safety issues.</li> <li>- They have the competency to lead a discussion and to make decisions in a plant engineering project.</li> </ul> <p><u>Personal competencies</u></p> <ul style="list-style-type: none"> <li>- are able to make decisions on their own and they can set up appropriate documents.</li> </ul>
<b>Contents:</b>	<p>Scaling and cost estimation of plants</p> <p>Safety Issues and HAZOP-Studies</p> <p>Block-diagram, flow-diagram, P&amp;ID Diagram,</p> <p>Main components (Motor, compressors, pumps, piping, heat exchanger, instrumentation...)</p> <p>Measurement devices for e.g. mass flow, temperature, velocity, vibration...</p> <p>Sizing of pipes</p>
<b>Assessment</b>	Written final exam (2 hours)

Project Management Certification	
<b>Study Program</b>	International Project Engineering
<b>Study level and semester</b>	Bachelor, 6 <sup>th</sup> Semester
<b>ECTS Credits</b>	3
<b>Hours per week / total contact hours</b>	2 / 30
<b>Total hours of study</b>	60
<b>Type/Teaching Method</b>	Seminar-style Lecture. Taught as compact course on 3-4 selected dates!
<b>Language of instruction</b>	English
<b>Frequency</b>	Every Semester
<b>Course Coordinator/Instructor</b>	Erik Lehmann
<b>Restrictions</b>	Only 5-6 international Students at the maximum can be admitted to this course.
<b>Prerequisites:</b>	
<b>Course learning objectives:</b>	<p><u>Professional competence</u> The students...</p> <ul style="list-style-type: none"> <li>- can operationalize goals</li> <li>- can manage risks, opportunities &amp; stakeholders</li> <li>- know how to calculate and optimize the process and deadlines in the network plan</li> <li>- can create a traceable target system using a project structure and reporting system</li> <li>- can use MS Project (critical path and chain) and create result variables for project controlling.</li> <li>- can plan and track project resources and project costs.</li> </ul> <p><u>Methodological competence</u> The students...</p> <ul style="list-style-type: none"> <li>- know how to apply communication psychology models in the implementation of project content.</li> <li>- know methods for organizing and carrying out tasks.</li> </ul> <p><u>Social competence</u> The students...</p> <ul style="list-style-type: none"> <li>- can deal more consciously with questioning techniques for leadership and negotiation.</li> <li>- can analyze, anticipate and carry out team development.</li> </ul> <p><u>Self-competence</u> The students...</p> <ul style="list-style-type: none"> <li>- reflect on themselves and the learning outcomes of group work and can improve the work result as a result.</li> </ul>

	<p>- can realistically assess their own abilities.          know how to ensure trust, integrity and a good relationship level so that crises and conflicts can be handled confidently or resolved professionally.</p>
<b>Contents:</b>	<p>ICB 3.0 Competence Elements:          1.01 project management success          1.02 interested parties          1.03 project requirements &amp; objectives          1.04 Risk &amp; opportunity          1.05 quality          1.06 project organisation          1.07 teamwork          1.08 problem resolution          1.09 project structures –          1.10 scope &amp; deliverables          1.11 time &amp; project phases          1.12 resources          1.13 cost &amp; finance          1.14 procurement &amp; contract          1.15 changes          1.16 control &amp; reports –          1.17 information &amp; documentation          1.18 communication          1.19 start-up          1.20 close-out – PM behavioural competencies</p>
<b>Textbooks:</b>	Lecture notes in English
<b>Assessment</b>	Graded: Written exam

Intercultural Communication	
<b>Study Program</b>	International Project Engineering
<b>Study level and semester</b>	Bachelor, 7 <sup>th</sup> Semester
<b>ECTS Credits</b>	5
<b>Hours per week / total contact hours</b>	4 / 60
<b>Total hours of study</b>	150
<b>Type/Teaching Method</b>	Presentation, case studies, discussions, group work
<b>Language of instruction</b>	English
<b>Frequency</b>	Every Semester
<b>Course Coordinator/Instructor</b>	Prof. Dr. Kerstin Reich E-Mail: <a href="mailto:kerstin.reich@Reutlingen-University.DE">kerstin.reich@Reutlingen-University.DE</a>
<b>Restrictions</b>	Only 5-6 international Students at the maximum can be admitted to this course.
<b>Prerequisites:</b>	
<b>Course learning objectives:</b>	<p>After successful completion, students:</p> <p><u>Professional competencies</u></p> <ul style="list-style-type: none"> <li>- have understood the scope of different cultural models and have the ability to transfer and</li> <li>- apply theoretical knowledge to real-life settings.</li> <li>- have achieved a deeper understanding of cultural differences (e.g. national, regional but</li> <li>- also on group level).</li> <li>- have achieved the competences in leading international teams, negotiating strategies and</li> <li>- business behavior.</li> </ul> <p><u>Methodological competencies</u></p> <ul style="list-style-type: none"> <li>- can analyse case studies and critical incidents in an intercultural context.</li> <li>- can apply cultural dimensions and theoretical background to real-life settings.</li> </ul> <p><u>Social competencies/ International competencies</u></p> <ul style="list-style-type: none"> <li>- have awareness of different values and cultural imprinting.</li> <li>- have a set of tools in order to react in a flexible way in cultural situations.</li> <li>- improved oral and written communication skills.</li> <li>- can give and receive feedback from fellow students in a structured and constructive manner.</li> </ul> <p><u>Personal competencies</u></p>

	- have awareness of one's own personality and its relation to other cultures, understand one's own personality and its implications to teamwork.
<b>Contents:</b>	Overview of main intercultural management concepts and approaches Verbal and non-verbal communication concepts Training individual intercultural competences Self-assessment
<b>Textbooks:</b>	Browaeyns, M.-J., Price, R. Understanding Cross-Cultural Management, FT Press, newest edition. Hall, E.T., Hall M. R. (1990) Understanding Cultural Differences, Yarmouth: Intercultural Press. Hofstede, G., Hofstede, G. J. Cultures and Organisations – Software of the Mind, Mcgraw-Hill Professional, newest edition. Rothlauf, J., A Global View on Intercultural Management: Challenges in a Globalized World. Verlag De Gruyter Studium, newest edition. Trompenaars, F., Hampden-Turner, C. Riding the Waves of Culture: Understanding Cultural Diversity in Business, Nicholas Brealey Publishing, newest edition.
<b>Assessment</b>	Graded: Written seminar paper (70%), group presentations (30%)

Scientific Approaches and Methods	
<b>Study Program</b>	International Project Engineering
<b>Study level and semester</b>	Bachelor, 5 <sup>th</sup> semester
<b>ECTS Credits</b>	3
<b>Hours per week / total contact hours</b>	2 / 30
<b>Total hours of study</b>	90
<b>Type/Teaching Method</b>	E-Learning course
<b>Language of instruction</b>	English
<b>Frequency</b>	Every Semester
<b>Course Coordinator/Instructor</b>	Silvia Casellato <a href="mailto:Silvia.Casellato@Reutlingen-University.DE">Silvia.Casellato@Reutlingen-University.DE</a>
<b>Restrictions</b>	
<b>Prerequisites:</b>	This course requires a weekly continuous active participation throughout the whole semester! Participation is continuously assessed.
<b>Course learning objectives:</b>	<p>After successful completion of the course the students will have developed the following competences:</p> <p>Professional competencies</p> <ul style="list-style-type: none"> <li>Working, writing and citing according to the scientific methodology</li> </ul> <p>Methodological competencies</p> <ul style="list-style-type: none"> <li>Critically evaluating existing scientific work and literature</li> <li>Presenting results scientifically</li> </ul> <p>Social competencies</p> <ul style="list-style-type: none"> <li>Life-long learning competencies, by following the e-Learning part of the course during the international practical internship</li> </ul> <p>International competencies</p> <ul style="list-style-type: none"> <li>Integrating into the international scientific community</li> </ul>
<b>Contents:</b>	Principles of research Contributing to the body of knowledge

	<p>The scientific method</p> <p>Research questions</p> <p>Research design &amp; methodology</p> <p>Documenting a research process</p> <p>Writing an introduction</p> <p>Scoping studies vs. literature review</p> <p>Organizing literature</p> <p>Referencing and citation styles</p> <p>Results vs. Discussion</p> <p>How to phrase a paragraph</p> <p>Research ethics</p> <p>Presenting scientific results</p> <p>Time- and self-management</p> <p>The course is designed as a synchronous e-learning course accessible in Relax. e-learning means you can take this course anywhere where you have a computer and internet access, i.e. during your practical semester, from home or at university. Synchronous means the course is timed and every week you will be required to work through new material, research, read, write and submit a certain piece of writing. Despite the flexibility in location, you will extensively work with your peers by reviewing their work and discussing improvements.</p> <p>The examination method is continuous assessment; hence, you will only pass this course if you have made enough successful weekly submissions. Apart from professional and methodological competences, you will acquire life-long learning competencies with this course.</p>

<b>Assessment</b>	Graded: Continuous Assessment (CA)

Smart Systems	
<b>Study Program</b>	International Project Engineering
<b>Study level and semester</b>	Bachelor, 6 <sup>th</sup> semester
<b>ECTS Credits</b>	7
<b>Hours per week / total contact hours</b>	5 / 75
<b>Total hours of study</b>	210
<b>Type/Teaching Method</b>	Lecture, case studies, project assignment, group work and discussions, presentations, project documentation
<b>Language of instruction</b>	English
<b>Frequency</b>	Every Semester
<b>Course Coordinator/Instructor</b>	Markus Wachter, Antonio Notholt <a href="mailto:markus.wachter@reutlingen-university.de">markus.wachter@reutlingen-university.de</a> , <a href="mailto:antonio.notholt@reutlingen-university.de">antonio.notholt@reutlingen-university.de</a>
<b>Restrictions</b>	Only 5-6 international Students at the maximum can be admitted to this course.
<b>Prerequisites:</b>	This is an <b>advanced course</b> requiring:  University Level Math (Algebra, Analysis, Trigonometry); Physics basics; Electrical Engineering basics; Computer Science (basic knowledge how to design, test and implement software in any language); Electrical drives; Control Engineering basics.
<b>Course learning objectives:</b>	At the end of the course students:  <b>Professional competencies</b> <ul style="list-style-type: none"> <li>• are able to choose technical components for a smart system</li> <li>• can define the system architecture with their mechanical, electronical, software and communication interfaces</li> <li>• understand and are able to fine tune and enhance existing image processing algorithms, communication infrastructures, graphical user interfaces and machine learning algorithms</li> <li>• have integrated a smart system and understand its limitations and challenges</li> <li>• can evaluate possible applications for smart systems</li> </ul> <b>Methodological competencies</b> <ul style="list-style-type: none"> <li>• can discuss the advantages and disadvantages of the application of new “smart” technology in various fields</li> <li>• can identify needed project positions and set up a team for system development</li> <li>• can present the project status of the current smart system</li> </ul> <b>Social/Personal competencies</b> <ul style="list-style-type: none"> <li>• are able to identify needed capabilities of different positions in a development team</li> </ul>

	<ul style="list-style-type: none"> <li>• can assign persons from a team to the needed positions in the project</li> <li>• can cooperate within a heterogenous team and solve conflicts regarding different interests</li> <li>• can design and implement a challenging technical system in a team</li> <li>• have created a project documentation consisting of technical artefacts</li> </ul>
<b>Contents:</b>	<p><b>Technology:</b> Digital control and integration of microsystems, IoT principles its practical implementation, machine learning, AI, neural networks, predictive analysis, self-X-systems (learning, organizing, optimizing, repairing)</p> <p><b>Applications:</b> Smart cities, IoT, smart traffic, smart society, digital business management, smart health</p> <p><b>Beyond:</b> Business models, ecosystems for smart solutions</p>
<b>Textbooks:</b>	<p>Deep learning / Ian Goodfellow, Yoshua Bengio and Aaron Courville, The MIT Press, [2016]</p> <p>Artificial intelligence : a modern approach / Stuart Russell; Peter Norvig, 2016</p> <p>The Internet of things : how smart TVs, smart cars, smart homes, and smart cities are changing the world / Michael Miller, 2015</p> <p>IoT System Design : Project Based Approach / by Alice James, Avishkar Seth, Subhas Chandra Mukhopadhyay, 2022</p>
<b>Assessment</b>	Graded: Project Work (PA)

## Mechanical Engineering Bachelor

Heat Transfer	
Study Program	Mechanical Engineering
Study level and semester	Bachelor
ECTS Credits	6
Hours per week / total contact hours	4 / 60
Total hours of study	180
Type/Teaching Method	Lecture
Language of instruction	English
Frequency	Every Semester
Course Coordinator/Instructor	Prof. Dr.-Ing. Bernd Thomas E-Mail: <a href="mailto:bernd.thomas@reutlingen-university.de">bernd.thomas@reutlingen-university.de</a>
Restrictions	The course is designed for students from the following partner universities: Valparaiso University, Kettering University, NC State University. <b>A minimum number of 5 international students</b> is required for offering the course in English. As tailored for students from the aforesaid Universities, the language of instruction is English until the exam for the international students in mid-December (Chapter 1-5). For the remaining lessons thereafter, which are assigned to Chapter 6, the language of instruction will be German.
Prerequisites:	Basic Math skills
Course learning objectives:	The objective of this course is to provide an insight into heat transfer problems. Topics covered include heat transfer by conduction, both multi-dimensional and non-stationary; convection and radiation; the design of heat exchangers. The focus is on the transformation of the physical problems into appropriate mathematical equations, in order to achieve the desired results.
Contents:	<ol style="list-style-type: none"> <li>1. Fundamentals</li> <li>2. Thermal Conduction <ol style="list-style-type: none"> <li>2.1 Steady-state, 1-dimensional conduction, Integral approach</li> <li>2.2 Transient, 1-dimensional conduction</li> </ol> </li> <li>3. Convection <ol style="list-style-type: none"> <li>3.1 Thermal boundary layer and heat transfer coefficient</li> <li>3.2 Heat transfer correlations in case of forced convection</li> <li>3.4 Heat transfer correlations in case of free (natural) convection</li> </ol> </li> <li>4. Thermal radiation</li> <li>5. Overall heat transfer, heat exchangers <ol style="list-style-type: none"> <li>5.1 The overall heat transfer coefficient</li> <li>5.2 Heat exchangers</li> </ol> </li> </ol>

	<p>5.3 Fined surfaces</p> <p>6. Thermal conduction, differential approach</p> <p>6.1 Steady-state, 1-dimensional conduction</p> <p>6.2 Steady-state, 1-dimensional conduction incl. internal heat generation</p> <p>6.3 Steady-state, 2 and 3-dimensional conduction</p> <p>6.4 The transient differential equation</p>
<b>Textbooks:</b>	<p>F.P. Incropera, D.P. DeWitt, T.L. Bergmann, A.S. Lavine Introduction to Heat Transfer John Wiley &amp; Sons, 6th ed., 2011</p> <p>T.L. Bergmann Fundamentals of Heat and Mass Transfer John Wiley &amp; Sons Inc, 8th ed., 2016</p>
<b>Assessment</b>	Graded: Written exam, 2 hours

<b>Course Coordinator/Instructor</b>	Prof. Dr. Simon Peter
<b>Restrictions</b>	None
<b>Prerequisites:</b>	Strength Analysis
<b>Course learning objectives:</b>	Strength Analysis of simple mechanical designs with the help of Creo Simulate (FEM Code)
<b>Contents:</b>	FEM deals with the analysis of structures subject to mechanical and thermal loads. Starting from CAD-Models we learn how to perform a static or dynamic FEM analysis, use the most often available tools and try to interpret the results. Topics such as boundary conditions and singularities, sensitivity and optimization analysis, screw and welded joints are covered. There are lectures where short presentations introduce the problems and labs where the students work on these problems.
<b>Textbooks:</b>	Creo Simulate 3.0 Tutorial, Roger Toogood
<b>Assessment</b>	Graded: Students are supposed to give presentations in the lectures and perform a group project.

<b>Course Coordinator/Instructor</b>	Prof. Dr. rer-nat. Barbara Priwitzer E-Mail: <a href="mailto:barbara.priwitzer@reutlingen-university.de">barbara.priwitzer@reutlingen-university.de</a>
<b>Restrictions</b>	<b>A minimum number of 3 international students</b> is required for offering the course in English.
<b>Prerequisites:</b>	
<b>Course learning objectives:</b>	<p><u>Professional competence</u> Students... - understand how data can be used in an engineering context with the help of various analysis methods.</p> <p><u>Methodological competence</u> Students... - can analyse data with the help of software; - can successfully apply and evaluate various data analysis methods.</p> <p><u>Social competence</u> Students... - know how to collect, analyse and interpret data responsibly without violating the privacy or rights of others; - can communicate complex data analyses and their results clearly and comprehensibly.</p> <p><u>Self-competence</u> The students... - can work independently, accurately and persistently; - are able to critically evaluate their own results.</p>
<b>Contents:</b>	<p><u>Exploratory data analysis:</u> Graphical methods, central tendency of variables and their dispersion, outlier analysis, treatment of missing values</p> <p><u>Regression analysis:</u></p>

	<p>Fundamentals of regression, evaluation measures and applications, multilinear and generalised linear models</p> <p><u>Classification:</u> Definition of a classification problem, evaluation, methods for classification from machine learning, feature selection and normalisation</p>
<p><b>Textbooks:</b></p>	<p>Joel Grus: Data Science from Scratch: First Principles with Python, O’Reilly 2015</p> <p>Matthias Plaue: Data Science: An Introduction to Statistics an Machine Learning, Springer 2023</p> <p>Laura Igual, Santi Seguí: Introduction to Data Science: A Python Approach to Concepts, Techniques and Applications, 2nd edition, Springer 2024</p>
<p><b>Assessment</b></p>	<p>Continuous Assessment</p>

## Mechanical Engineering Master

<b>Applied Mathematics</b>	
<b>Study Program</b>	Mechanical Engineering
<b>Study level and semester</b>	Master, 1 <sup>st</sup> Semester
<b>ECTS Credits</b>	6
<b>Hours per week / total contact hours</b>	4 / 60
<b>Total hours of study</b>	180
<b>Type/Teaching Method</b>	Lecture and practice sessions
<b>Language of instruction</b>	English or German (depending on the demands of the participants)
<b>Frequency</b>	Every Semester
<b>Course Coordinator/Instructor</b>	Prof. Dr. Ing. Simon Peter Simon.peter@reutlingen-university.de Prof. Dr. rer. nat. Barbara Priwitzer <a href="mailto:barbara.priwitzer@reutlingen-university.de">barbara.priwitzer@reutlingen-university.de</a>
<b>Restrictions</b>	None
<b>Prerequisites:</b>	Basic courses in Mathematics, especially: <ul style="list-style-type: none"> <li>▪ basic analysis of functions of one and several variables</li> <li>▪ theory of ordinary differential equations (ODEs)</li> <li>▪ linear algebra</li> </ul> MATLAB: basic knowledge
<b>Course learning objectives:</b>	<ul style="list-style-type: none"> <li>▪ Awareness of the problems that can arise when solving mathematical problems numerically.</li> <li>▪ Knowledge of basic algorithms for the classical tasks in numerical analysis (solving equations, integration, ...).</li> <li>▪ Assessing the quality of numerical solutions.</li> <li>▪ Improving programming skills.</li> </ul>
<b>Contents:</b>	<p>Topics are chosen from</p> <ul style="list-style-type: none"> <li>▪ Floating point arithmetic</li> <li>▪ Conditioning of numerical problems</li> <li>▪ Direct and iterative methods for solving systems of linear equations</li> <li>▪ Numerical Integration</li> <li>▪ Numerical solution of ordinary differential equations</li> <li>▪ Solving nonlinear equations</li> <li>▪ Polynomial and Spline interpolation</li> </ul>
<b>Textbooks:</b>	<ul style="list-style-type: none"> <li>▪ Gisela Engeln-Müllges/ Klaus Niederdröck/ Reinhard Wodicka: Numerik-Algorithmen, 10. Auflage, Springer 2010</li> <li>▪ Steven Chapra/ Raymond Canale: Numerical methods for engineers, 8<sup>th</sup> ed., McGraw Hill 2021</li> <li>▪ Masayuki Yano/ James Douglas Penn/ George Konidaris/ Anthony T Patera: Maths, Numerics and Programming for Mechanical Engineers, MIT Open Course Ware 2013</li> </ul>
<b>Assessment</b>	Graded: problem sheets + written exam (120 min)

Numerical Structural Mechanics	
<b>Study Program</b>	Mechanical Engineering
<b>Study level and semester</b>	Master, 2 <sup>nd</sup> Semester
<b>ECTS Credits</b>	7
<b>Hours per week / total contact hours</b>	6 / 90
<b>Total hours of study</b>	210
<b>Type/Teaching Method</b>	Lecture and laboratory assignments
<b>Language of instruction</b>	English
<b>Frequency</b>	Every Semester
<b>Course Coordinator/Instructor</b>	Prof. Dr.-Ing. Michael Lauxmann E-Mail: <a href="mailto:michael.lauxmann@reutlingen-university.de">michael.lauxmann@reutlingen-university.de</a>
<b>Restrictions</b>	Only taught in English if demanded by 3 international students at the minimum
<b>Prerequisites:</b>	Numeric, Partial Differential Equations
<b>Course learning objectives:</b>	Getting to know the basics of the multibody and finite element method in terms of their theoretical principles and their practical use.-
<b>Contents:</b>	The course starts with an introduction on different modelling technics. It considers various aspects of multibody system dynamics including the theoretical basics of kinematics and kinetics as well as principles of mechanics. Later on an introduction in finite element systems follows, focusing on static and basic transient stress analysis applications. By means of examples out of the field of mechanical engineering, special focus is given on dynamical phenomena. Lectures and exercises alternate in an adequate manner to complete the understanding of the topics. The exercises comprise both manual exercises on a piece of paper as well as computer-aided exercises in the simulation laboratories with the help of Ansys and Matlab.
<b>Textbooks:</b>	Technische Dynamik, Schiehlen, W. und Eberhard, P. ;
<b>Assessment</b>	Finite element procedures, Bathe, K.-J.

Basic Principles of Energy Conversion	
<b>Study Program</b>	Mechanical Engineering
<b>Study level and semester</b>	Master, 1 <sup>st</sup> semester
<b>ECTS Credits</b>	3
<b>Hours per week / total contact hours</b>	2 / 30
<b>Total hours of study</b>	90
<b>Type/Teaching Method</b>	Lecture
<b>Language of instruction</b>	English
<b>Frequency</b>	Every Semester
<b>Course Coordinator/Instructor</b>	Prof. Dr.-Ing. Frank Truckenmüller E-Mail: <a href="mailto:Frank.Truckenmueller@Reutlingen-University.DE">Frank.Truckenmueller@Reutlingen-University.DE</a>
<b>Restrictions</b>	Only taught in English if demanded by 3 international students at the minimum
<b>Prerequisites:</b>	Understanding of fundamentals of thermodynamics
<b>Course learning objectives:</b>	Understanding of the fundamentals of conversion of energy applied to different processes and option for improvement
<b>Contents:</b>	<ol style="list-style-type: none"> <li>1.) Global energy consumption and future global development</li> <li>2.) forms of energy and energy concepts and the theoretical foundations</li> <li>3.) Energetic evaluation criteria; efficiency, energy-harvesting factor etc</li> <li>4.) Apply the thermodynamic assessment criteria on combustion and associated cycles in thermal power plants; Steam turbine, gas turbine, combustion engines</li> <li>5.) Energy Conversion at the examples of the pumped storage power plant and wind power</li> <li>6.) Energy Conversion at the examples of the fuel cell and photovoltaic</li> <li>7.) Energy Conversion examples of biogenic energy conversion</li> <li>8.) Energy Conversion at the example of solar thermal</li> </ol> Criteria for assessment of energy storage
<b>Textbooks:</b>	
<b>Assessment</b>	Graded: Project, presentation and exam

## Mechatronics Bachelor

<b>Electrical Drives</b>	
<b>Study Program</b>	Mechatronics
<b>Study level and semester</b>	Bachelor, 6th Semester
<b>ECTS Credits</b>	4
<b>Hours per week / total contact hours</b>	3 / 45
<b>Total hours of study</b>	120
<b>Type/Teaching Method</b>	Introductory lecture session. All following sessions will be taking place as tutorials and practical trainings in the laboratory
<b>Language of instruction</b>	Course materials, exam and lab assignments will be provided in English.
<b>Frequency</b>	Every Semester
<b>Course Coordinator/Instructor</b>	Prof. Dr.-Ing. Gernot Schullerus E-Mail: <a href="mailto:gernot.schullerus@reutlingen-university.de">gernot.schullerus@reutlingen-university.de</a>
<b>Restrictions</b>	None
<b>Prerequisites:</b>	Mathematics Fundamentals of electrical engineering Principles of mechanics
<b>Course learning objectives:</b>	Students are familiar with the structure, the operating principles and the behaviour during operation of the following drive types: dc-machine induction machine permanent magnet synchronous machine brushless dc-motor stepper motor  Students are able to choose and do the dimensioning for an electrical drive for a given application
<b>Contents:</b>	<ul style="list-style-type: none"> <li>- Materials, standards and basic definitions</li> <li>- DC-machine</li> <li>- Rotating field machines</li> <li>- Brushless-DC motors</li> <li>- Stepper motors</li> <li>- Dimensioning of electrical drives</li> </ul>

<b>Textbooks:</b>	Lecture notes are provided
<b>Assessment</b>	Graded: Written exam (1h)

Interactive Robots in Motion	
<b>Study Program</b>	Mechatronics
<b>Study level and semester</b>	Bachelor, 7th semester
<b>ECTS Credits</b>	3
<b>Hours per week / total contact hours</b>	2 / 30
<b>Total hours of study</b>	60
<b>Type/Teaching Method</b>	Lectures, Practical Training and Projects
<b>Language of instruction</b>	English
<b>Frequency</b>	Every Semester
<b>Course Coordinator/Instructor</b>	Prof. Dr. rer. nat. Matthias Rätsch E-Mail: <a href="mailto:matthias.raetsch@reutlingen-university.de">matthias.raetsch@reutlingen-university.de</a>
<b>Restrictions</b>	
<b>Prerequisites:</b>	
<b>Course learning objectives:</b>	<p>The students know the fundamentals of the interaction and collaboration of intelligent robots with humans in the times of industry 4.0 and the change from industrial robots to intelligent, autonomous and collaborative systems, which are one day hardly distinguishable from humans.</p> <p>Students appreciate that robots are getting faster, stronger and more intelligent and therefore why they are better at playing chess, Go and StarCraft II. Students will acquire knowledge and will be able to answer questions about AI and robotics, in areas such as: How and when is the Turing Test "applied"? Secrets of non-verbal interaction? Avatars in computer games and virtual worlds? How do Google Glass + Siri work and what can they be used for? Will robots be the better humans? Will they replace us in my future career? What means super intelligence, singularity and transhumanism?</p> <p>The students are familiar with current developments in the field of collaborative, intelligent robots, have initial experience in the practical use of these systems and can assess the effects on the areas of our life.</p> <p>An optional follow-up project can be selected to consolidate the learning objectives.</p>
<b>Contents:</b>	<ul style="list-style-type: none"> <li>- Basics of modern 3D sensor technology in mobile robotics.</li> <li>- Artificial intelligence for autonomous and collaborative robots.</li> <li>- Autonomous localization and navigation using monocular SLAM techniques.</li> <li>- Verbal and non-verbal interaction between robots and humans.</li> <li>- The use, impact and vision of the new generation of intelligence and robots.</li> </ul>

	<ul style="list-style-type: none"> <li>- Practical approach to interactive, mobile and collaborative robots, as well as SDKs.</li> <li>- Design and development of concepts, modules and prototypes for leading collaborative robots in industrial projects or for RC@Home.</li> <li>- if applicable, continuation of the successes of the world champion team.</li> </ul>
<p><b>Textbooks:</b></p>	<p>Lit. on Pattern Recognition and Machine Learning: e.g. by Christopher M. ## Mechatronics Master

Distributed Control in Power Grids	
<b>Study Program</b>	Mechatronics
<b>Study level and semester</b>	Master, 2 <sup>nd</sup> semester
<b>ECTS Credits</b>	3 ECTS Credits
<b>Hours per week / total contact hours</b>	2 / 30
<b>Total hours of study</b>	90
<b>Type/Teaching Method</b>	Lecture, use of specific software and project
<b>Language of instruction</b>	English
<b>Frequency</b>	Every Semester
<b>Course Coordinator/Instructor</b>	Prof. Dr.-Ing. Debora Coll-Mayor, Prof. Dr.-Ing. Antonio Notholt E-Mail: <a href="mailto:Debora.coll-mayor@reutlingen-university.de">Debora.coll-mayor@reutlingen-university.de</a> <a href="mailto:Antonio.Notholt@Reutlingen-University.DE">Antonio.Notholt@Reutlingen-University.DE</a>
<b>Restrictions</b>	None
<b>Prerequisites:</b>	Knowledge of Energy markets and energy economy
<b>Course learning objectives:</b>	<ul style="list-style-type: none"> <li>– The students know the basics of Blockchain based Technologies;</li> <li>– The students learn about the regulatory framework of these new technologies</li> <li>– The students can develop simple use cases using blockchain based solutions</li> <li>– The students can develop new business cases based on those solutions</li> <li>– The students learn about basics and new tendencies in transactive control</li> </ul>
<b>Contents:</b>	<ul style="list-style-type: none"> <li>– Distributed ledger technologies;</li> <li>– Use of cryptocurrencies in the energy economy;</li> <li>– Smart contracts and distributed registers;</li> <li>– Analysis of new System Use Cases;</li> <li>– Analysis of new Business Use Cases;</li> <li>– Standardisation and regulatory barriers;</li> <li>– A step forward: The concept of transactive control.</li> </ul>
<b>Textbooks:</b>	The literature will be given during the lecture.
<b>Assessment</b>	Graded: project

Software-System Architecture	
<b>Study Program</b>	Mechatronics
<b>Study level and semester</b>	Master, 2nd Semester
<b>ECTS Credits</b>	3
<b>Hours per week / total contact hours</b>	2 / 30
<b>Total hours of study</b>	90
<b>Type/Teaching Method</b>	Lecture
<b>Language of instruction</b>	English
<b>Frequency</b>	Every Semester
<b>Course Coordinator/Instructor</b>	Prof. Dr.-Ing. Jens Weiland, <a href="mailto:Jens.Weiland@Reutlingen-University.de">Jens.Weiland@Reutlingen-University.de</a>
<b>Restrictions</b>	Only taught in English if demanded by 3 international students at the minimum
<b>Prerequisites:</b>	
<b>Course learning objectives:</b>	<p>In the area of technical software systems different “quasi” standards have been established within the last years. In the automobile industrie specifications for the Classic and Adaptive AUTOSAR-platform have been developed; within robotics the specification and implementation of the Robot Operating System (ROS) are available. These embedded platforms are based on different software architectural concepts.</p> <p>Within this course students learn architectural and middleware concepts of these common state-of-the-art software system architectures. At the end of the module students</p> <p><u>Professional expertise</u></p> <ul style="list-style-type: none"> <li>- know the structure and behavior of these architectures</li> <li>- are able to apply selected architectural and middleware concepts for realizing embedded software system architectures</li> </ul> <p><u>Methodological expertise</u></p> <ul style="list-style-type: none"> <li>- know the methodologies to develop embedded systems based on “Classic and Adaptive AUTOSAR” as well as the Robot Operating System (ROS) and how to apply these methodologies</li> <li>- are able to trade against pros and cons of alternatives in developing software solutions based on the discussed embedded software system architectures</li> </ul>
<b>Contents:</b>	- Overview of relevant process models, software development phases and programming

	<p>paradigms for developing embedded software</p> <ul style="list-style-type: none"> <li>- Essential architecture principles and concepts for developing embedded software systems</li> <li>- Design principles and patterns</li> <li>- Architectural patterns like Product Line Architecture, Layered Architecture, Client/Server Architecture, Message-oriented Architecture, Service-oriented Architecture</li> <li>- Selected industrial-relevant reference architectures in the embedded domain and their realization of middleware concepts: <ul style="list-style-type: none"> <li>- Classic AUTOSAR</li> <li>- Structure and behavior of the Classic AUTOSAR architecture</li> <li>- Software integration package and AUTOSAR tooling</li> <li>- Selected Classic AUTOSAR modules and concepts, e.g. SW-C, RTE, OS, Com</li> <li>- Adaptive AUTOSAR</li> <li>- Structure and behavior of the Adaptive AUTOSAR architecture</li> <li>- Selected Adaptive AUTOSAR modules and concepts, e.g. service-oriented communication, OS, execution management</li> </ul> </li> <li>- Robot Operating System</li> <li>- Structure and behavior of ROS</li> <li>- Selected ROS concepts, e.g. nodes, DDS-based communication</li> </ul>
<p><b>Textbooks:</b></p>	<ul style="list-style-type: none"> <li>- AUTOSAR: Classic and Adaptive AUTOSAR Specification, <a href="http://www.autosar.org">www.autosar.org</a></li> <li>- O. Scheid: AUTOSAR Compendium, Part 1 – Application &amp; RTE. <a href="http://ar-compendium.com">ar-compendium.com</a>, 2015</li> <li>- ROS: Robot Operating System, <a href="http://www.ros.org">www.ros.org</a></li> <li>- L. Joseph, A. Johny: Robot Operating System (ROS) for Absolute Beginners, Apress, 2022.</li> </ul>

<b>Course learning objectives:</b>	<p>The students know the fundamentals of the interaction and collaboration of intelligent robots with humans in the times of industry 4.0 and the change from industrial robots to the Personal Assistant, which is hardly distinguishable from humans.</p> <p>Students appreciate that robots are getting faster, stronger and more intelligent and therefore why they are better at playing chess, Go and StarCraft II.</p> <p>Students will acquire knowledge and will be able to answer questions about AI and robotics, in areas such as "How and when is the Turing Test" applied"? Secrets of non-verbal interaction? Avatars in computer games and virtual worlds? How do Google Glass + Siri work and what can they be used for? Will robots be the better people? Will they replace people in my future career? What is singularity and transhumanism?</p> <p>The students are familiar with current developments in the field of collaborative, intelligent robots, have initial experience in the practical use of these systems and can assess the effects on the areas of life of those involved.</p> <p>An optional follow-up project can be selected to consolidate the learning objectives.</p>
<b>Contents:</b>	<ul style="list-style-type: none"> <li>- Basics of modern 3D sensor technology in mobile robotics.</li> <li>- Artificial intelligence for autonomous and collaborative robots.</li> <li>- Autonomous localization and navigation using monocular SLAM techniques.</li> <li>- Verbal and non-verbal interaction between robots and humans.</li> <li>- The use, impact and vision of the new generation of intelligence and robots.</li> </ul>

	<ul style="list-style-type: none"> <li>- Practical approach to interactive, mobile and collaborative robots, as well as SDKs.</li> <li>- Design and development of concepts, modules and prototypes for leading collaborative robots in industrial projects or for RC@Home.</li> <li>- if applicable, continuation of the successes of the world champion team.</li> </ul>
<p><b>Textbooks:</b></p>	<p>Lit. on Pattern Recognition and Machine Learning: e.g. by Christopher M. Machine Vision and Artificial Intelligence Lecture with Laboratory	
<b>Study Program</b>	Mechatronics
<b>Study level and semester</b>	Master, 2nd Semester
<b>ECTS Credits</b>	6
<b>Hours per week / total contact hours</b>	5 / 75
<b>Total hours of study</b>	180
<b>Type/Teaching Method</b>	Lectures and Presentations
<b>Language of instruction</b>	English
<b>Frequency</b>	Every Semester
<b>Course Coordinator/Instructor</b>	Prof. Dr. rer. nat. Matthias Rätsch E-Mail: <a href="mailto:matthias.raetsch@reutlingen-university.de">matthias.raetsch@reutlingen-university.de</a>
<b>Restrictions</b>	Only 5-6 international Students at the maximum can be admitted to this course
<b>Prerequisites:</b>	
<b>Course learning objectives:</b>	<p>The students are familiar with the basics of machine learning (artificial intelligence) and the use of image processing in industrial environments and especially in the robotics and automotive industries. They will be able to create algorithms for simple application examples, which will then be implemented and tested in practical courses and projects.</p> <p>The students are capable of putting together an intelligent image processing system from available components which they can then use to complete simple tasks. The students are proficient in 3D sensors as well as 3D image and video processing, which they will then apply hands-on in projects with interactive mobile robots and assistance and service systems.</p> <p>The students will discuss and be familiar with the social challenges and opportunities of AI as well as questions of social ethics and acceptance research</p>
<b>Contents:</b>	<ul style="list-style-type: none"> <li>- Basics: Components of a Learning Machine Vision System</li> <li>- Data recording: camera technology, pre-processing, colour display, optics, lighting technology</li> <li>- Data processing (feature extraction, image analysis, feature extraction, classification/segmentation, error analysis)</li> <li>- Feature extraction: convolution, low pass, high pass, morphological filter feature space transformation: Chain rule, contour slider, applications - error analysis: FAR/FRR, lin. separable, error class analysis, efficiency - AI basics: Boolean and Fuzzy logic, classification, definition KI, Turing test, world knowledge theory ML: learning styles, DTree, Random Forests, NN, Perceptron, SVM (Lin/Non-lin, Kernel Trick)</li> </ul>

	<ul style="list-style-type: none"> <li>- 3D Image Processing (3D Sensors; RGB-D, TOF, Stereo; Shape from Shading/Motion, SLAM)- Video Processing (4D): Detection (Sliding Window, Image Pyramids, Sampling Theorem, Frequency Analysis, Compression, Blending), Tracking (Condensation, Motion Detection)</li> <li>- Model based machine learning: face modelling (representation of 3D data, data procurement for 3D data, morphable face model) PCA (data/corr/loading matrix, SVD, dim reduction, eigenvalue problem, eigenfaces)</li> <li>- Deep Learning - CNNs: Meaning, Difference NN to CNN, Layer Types, Convolution, Pooling, ReLu, Applications- History and visions of AI: Exp. Growth, Singularity, Transhumanity, Society. Challenges/opportunities for action, social ethics, acceptance</li> </ul>
<p><b>Textbooks:</b></p>	<p>Script based on the lecture slides.</p> <p>Corke, P.: Robotics, Vision and Control. Springer, Berlin.</p> <p>Jähne, B.: Digitale Bildverarbeitung. Springer, Berlin.</p> <p>Demant, C.; Streicher-Abel, B.; Springhoff, A.: Industrielle Bildverarbeitung: Wie optische Qualitätskontrolle wirklich funktioniert. Springer, Berlin.</p> <p>Bishop, C.M.: Pattern Recognition and Machine Learning</p>
<p><b>Assessment</b></p>	<p>Graded: Project work, seminar paper, presentation</p>

<b>Renewable Energies</b>	
<b>Study Program</b>	Mechatronics
<b>Study level and semester</b>	Master, 2nd Semester
<b>ECTS Credits</b>	3
<b>Hours per week / total contact hours</b>	2 / 30
<b>Total hours of study</b>	90
<b>Type/Teaching Method</b>	Lecture with integrated exercises
<b>Language of instruction</b>	English
<b>Frequency</b>	Every Semester
<b>Course Coordinator/Instructor</b>	Prof. Dr.-Ing. Antonio Notholt E-Mail: <a href="mailto:antonio.notholt@Reutlingen-University.DE">antonio.notholt@Reutlingen-University.DE</a>
<b>Restrictions</b>	
<b>Prerequisites:</b>	
<b>Course learning objectives:</b>	The students are familiar with technologies and processes of the production of electrical energy from renewable sources. They are able to perform a simple layout of installations. They know the key indicators and know how to apply them for assessing and comparing different installations. They are familiar with systemic components, common communication and information technologies as well as the potential of selected future innovations.
<b>Contents:</b>	Energy and climate protection Solar radiation Photovoltaics wind power Hydroelectric power Geothermal energy Use of biomass Hydrogen generation, fuel cells and methanation Economic efficiency calculations Simulation Communication and Information Technologies Integration of renewable energies in electrical grids
<b>Textbooks:</b>	Volker Quaschnig, Regenerative Energiesysteme: Technologie - Berechnung - Simulation. ISBN 978-3-446-44267-2
<b>Assessment</b>	Graded: Presentation, seminar paper

<b>Control Systems</b>	
<b>Study Program</b>	Mechatronics
<b>Study level and semester</b>	Master, 2nd Semester
<b>ECTS Credits</b>	3
<b>Hours per week / total contact hours</b>	2 / 30
<b>Total hours of study</b>	90
<b>Type/Teaching Method</b>	Lecture
<b>Language of instruction</b>	English
<b>Frequency</b>	Winter Semester
<b>Course Coordinator/Instructor</b>	Prof. Dr. Thorsten Zenner E-Mail: <a href="mailto:thorsten.zenner@reutlingen-university.de">thorsten.zenner@reutlingen-university.de</a>
<b>Restrictions</b>	
<b>Prerequisites:</b>	Basic knowledge of communication technologies as presented in lecture "communication systems" <b>At least one exam in electrical engineering, informatics or communication systems</b>
<b>Course learning objectives:</b>	Students will have a deeper understanding of state of the art communication technologies like radio communication, IEEE802.x (Ethernet, WLAN, Bluetooth LE), ethernet based fieldbuses and security. They will be able to evaluate different communication technologies according to specific performance indexes like throughput, realtime, security, etc.
<b>Contents:</b>	Physical and technical basics of radio communication. IEEE802.x communication (Ethernet, WLAN, Bluetooth) and 6LOWPAN (RFC 6282), Security (Encryption, hash-functions, digital signature, certificates), Functional Safety, ethernetbased fieldbuses (Ethercat, Powerlink, Profinet IRT)
<b>Textbooks:</b>	Lecture notes are provided in German, Andrew Tanenbaum u. a.: Computer Networks, 5. Auflage, Pearson Education Limited, (2014)
<b>Assessment</b>	Graded: oral exam

Control Systems Laboratory	
<b>Study Program</b>	Mechatronics
<b>Study level and semester</b>	Master, 2nd Semester
<b>ECTS Credits</b>	2
<b>Hours per week / total contact hours</b>	2 / 30
<b>Total hours of study</b>	60
<b>Type/Teaching Method</b>	Laboratory
<b>Language of instruction</b>	English
<b>Frequency</b>	Winter Semester
<b>Course Coordinator/Instructor</b>	Prof. Dr. Thorsten Zenner E-Mail: <a href="mailto:thorsten.zenner@reutlingen-university.de">thorsten.zenner@reutlingen-university.de</a>
<b>Restrictions</b>	Only in combination with Control Systems lecture
<b>Prerequisites:</b>	Basic knowledge of communication technologies as presented in lecture "communication systems"
<b>Course learning objectives:</b>	
<b>Contents:</b>	Lab assignments pertaining to the Control Systems lecture. Realtime and Performance testing using the following systems: - EnOcean (without battery), - Texas Instruments (Protokoll SimpliciiTI) - Nordic Semiconductor (Bluetooth Low Energy).
<b>Textbooks:</b>	
<b>Assessment</b>	Ungraded: Documentation of laboratory work

## Distributed Energy Systems and Energy Efficiency, Master

Distributed Economy in the Energy Sector	
<b>Study Program</b>	Distributed Energy Systems and Energy Efficiency
<b>Study level and semester</b>	Master, 2 <sup>nd</sup> semester
<b>ECTS Credits</b>	3 ECTS Credits
<b>Hours per week / total contact hours</b>	2 / 30
<b>Total hours of study</b>	90
<b>Type/Teaching Method</b>	Lecture, use of specific software and project
<b>Language of instruction</b>	English
<b>Frequency</b>	Every Semester
<b>Course Coordinator/Instructor</b>	Prof. Dr.-Ing. Debora Coll-Mayor E-Mail: <a href="mailto:Debora.coll-mayor@reutlingen-university.de">Debora.coll-mayor@reutlingen-university.de</a>
<b>Restrictions</b>	None
<b>Prerequisites:</b>	Knowledge of Energy markets and energy economy
<b>Course learning objectives:</b>	<ul style="list-style-type: none"> <li>– The students know the basics of Blockchain based Technologies;</li> <li>– The students learn about the regulatory framework of these new technologies</li> <li>– The students can develop simple use cases using blockchain based solutions</li> <li>– The students can develop new business cases based on those solutions</li> <li>– The students learn about basics and new tendencies in transactive control</li> </ul>
<b>Contents:</b>	<ul style="list-style-type: none"> <li>– Distributed ledger technologies;</li> <li>– Use of cryptocurrencies in the energy economy;</li> <li>– Smart contracts and distributed registers;</li> <li>– Analysis of new System Use Cases;</li> <li>– Analysis of new Business Use Cases;</li> <li>– Standardisation and regulatory barriers;</li> <li>– A step forward: The concept of transactive control.</li> </ul>
<b>Textbooks:</b>	The literature will be given during the lecture.
<b>Assessment</b>	Graded: 1 hour written exam and a project with oral presentation

## Interdisciplinary courses

<b>Career Management</b>	
<b>Study Program</b>	Bachelor, Master
<b>Study level and semester</b>	
<b>ECTS Credits</b>	2
<b>Hours per week / total contact hours</b>	2 / 30
<b>Total hours of study</b>	60
<b>Type/Teaching Method</b>	Intensive Course which takes place after the semester
<b>Language of instruction</b>	English
<b>Frequency</b>	Every semester / yearly (dependent on demand)
<b>Course Coordinator/Instructor</b>	Prof. Dr.-Ing. Helmut Nebeling
<b>Restrictions</b>	No restrictions, at least 6 participants, max. 25 participants
<b>Prerequisites:</b>	None
<b>Course learning objectives:</b>	Learning to adapt self-view and public-image in professional and personal surroundings, training of patterns of personality, practical aspects of getting into the job, career orientation
<b>Contents:</b>	<ul style="list-style-type: none"> <li>• Goal setting workshop</li> <li>• Features of mentality and character</li> <li>• Patterns of personality</li> <li>• Patterns of communication</li> <li>• Application training</li> <li>• Analysis of job advertisements</li> <li>• Assessment center</li> <li>• Self-discovery: How do I find what fits me?</li> <li>• Elevator pitch</li> <li>• Analysis of salaries, salary negotiations</li> </ul>
<b>Textbooks:</b>	
<b>Assessment</b>	Presentation  Ungraded

## Projects for Bachelor and Master Students

Semester Engineering Project
