

# 3D chocolate printer

## **RtChoc**

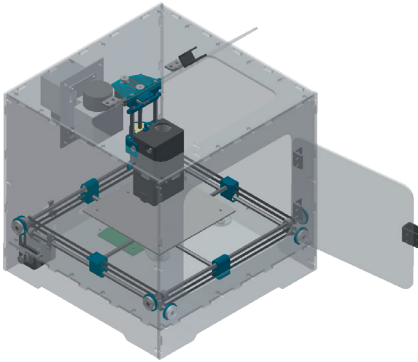

**Created as a development project  
for students**

**Low-cost FDM platform as a starting  
point for extruder development**

## Features:

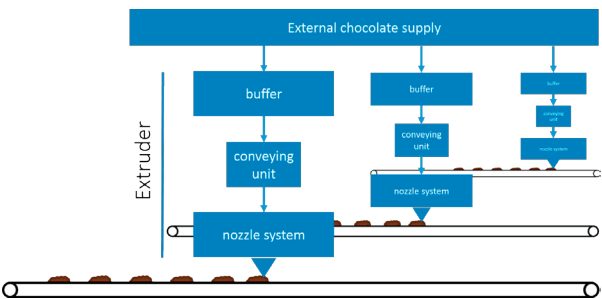

- Build volume: 150 x 150 x 40 mm
- Outer Dimensions: 420 x 420 x 450 mm
- Custom extruder concept
- PID-Controlled multi-zone heater
- Active cooled build area

- RtChoc is a new designed chocolate extruder
- RtChoc is designed for food safety
- RtChoc enables external material supply

→ **permanent production** is possible

→ prerequisite for **industrial / professional** use

## RtChoc extruders can be used in

- production lines for customer-specific manufacturing
- stand-alone devices for micro- and test-series
- stand-alone devices for confectioners and printing services
